#### About Us

Karthik Consulting was founded in 2008 to be a reliable and trusted advisor to our customers, providing independent and unbiased recommendations and solutions that mitigate risk and help solve their IT problems. We bring the innovation, passion, and agility of the commercial IT industry to meet the unique challenges of the government.

Our specialties include agile software development, DevSecOps, Cloud, Cyber Security, IT Operations & Maintenance (O&M), and Program Management.

We are a DOD Cleared Facility with a DCAA-approved accounting system.

### OASIS+ is the Right Choice

One Acquisition Solution for Integrated Services Plus (OASIS+) is a governmentwide, multi-award IDIQ contract designed to support federal agencies' procurement requirements for services-based solutions. The contract is available for use by agencies throughout the Federal Government.

#### About GSA OASIS+

##### C.2 – Performance Areas - Domains:

- (1) Management and Advisory
- (2) Technical and Engineering
- (3) Intelligence Services (Pending)

**C.2.1 - Sub-Area 1: Management and Advisory:** This This Domain includes a full range of management and consulting services that can improve a Federal agency's performance, its endeavors to meet mission goals, and provide operating advice and assistance on administrative and management issues. Management and Advisory Domain scope areas include, but are not limited to:

- (1) Business case development/analysis support
- (2) Business consulting
- (3) Business intelligence support
- (4) Integration of support systems
- (5) Business process reengineering
- (6) Change management
- (7) Knowledge management

**C.2.2 - Sub-Area 2: Technical and Engineering Domain:** This This Domain includes requirements to provide specific engineering, geoscience, or other technical professional skills, such as those performed by engineers, geologists, geophysicists, and technicians, required to handle specific operating conditions and problems for the benefit of the Government. Work under this Domain typically involves the application of physical laws and principles of engineering in the design; development, and utilization of machines, materials, instruments, processes, and systems; and providing expert advice and assistance on technical functions and issues. Technical and Engineering Domain scope areas include, but are not limited to:

- (1) System design & integration
- (2) System engineering
- (3) System security & information assurance
- (4) Technical assessment, data management, & planning
- (5) Independent verification & validation
- (6) Integration support
